NEW QUESTION: 1 A user states that every time they turn on their computer they have to change the computer's time and date. Which of the following should the technician perform FIRST to resolve this issue?
A. Change time zones
B. Perform a firmware update
C. Replace the drive cache battery
D. Synchronize with a different time date server
Answer: D

NEW QUESTION: 2 You have a Microsoft 365 subscription. A customer requests that you provide her with all documents that reference her by name. You need to provide the customer with a copy of the content. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
Answer: Explanation: Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/gdpr-dsr-office365>

NEW QUESTION: 3 Which three actions are required when configuring NAT-PT? (Choose **A.** Specify an IPv4-to-IPv6 translation
B. Enable NAT-PT globally
C. Specify an IPv6-to-IPv4 translation
D. Specify a ::/32 prefix that will map to an IPv6 address
E. Specify a ::/96 prefix that will map to an IPv4 address
F. Specify a ::/48 prefix that will map to a MAC address
Answer: A,C,E

NEW QUESTION: 4 A user has created an application which will be hosted on EC2. The

application makes calls to DynamoDB to fetch certain data. The application is using the DynamoDB SDK to connect with from the EC2 instance. Which of the below mentioned statements is true with respect to the best practice for security in this scenario?
A. The user should create an IAM user with DynamoDB access and use its credentials within the application to connect with DynamoDB
B. The user should create an IAM user with DynamoDB and EC2 access. Attach the user with the application so that it does not use the root account credentials
C. The user should create an IAM role, which has EC2 access so that it will allow deploying the application
D. The user should attach an IAM role with DynamoDB access to the EC2 instance
Answer: D
Explanation: With AWS IAM a user is creating an application which runs on an EC2 instance and makes requests to AWS, such as DynamoDB or S3 calls. Here it is recommended that the user should not create an IAM user and pass the user's credentials to the application or embed those credentials inside the application. Instead, the user should use roles for EC2 and give that role access to DynamoDB / S3. When the roles are attached to EC2, it will give temporary security credentials to the application hosted on that EC2, to connect with DynamoDB / S3.
