Answer: B
Explanation: To use Amazon EC2, you simply:

NEW QUESTION: 2 You identify an element in Application Modeller but when you highlight or use that element Blue Prism gives you an error message saying that duplicate elements were found. Which of the following statements is true?
A. It is common for duplicate elements to be found based upon the attributes that are ticked by default using the Blue Prism product. Time needs to be spent experimenting with the attribute ticks until a unique, reliable, and consistent selection of attributes are found.
B. It will not be possible to interface with the element in a unique way. You will need to use Surface Automation techniques for this element.
C. A code stage interface will need to be created and used for this application, this will give you more flexibility to interact with the application elements.
D. You will need to make the attributes you have selected dynamic. This will allow your flow to loop around, incrementing the attribute value until the correct element is found and used.
Answer: A
Explanation: Reason: It is common as the duplicate elements we are found by default as the attributes are provided by the application not by the blue prism. how do make our elements unique is not done by practicing and experience. (This is also mentioned in the Foundation course and as well as in other Pdf too)

NEW QUESTION: 3 Which of the following interpretations of duration and convexity is true?
I). Effective duration does not take into account the bond price's sensitivity to credit risk.
II). Portfolio convexity is the weighted average of the individual bonds' convexities.
III). Portfolio convexity will only provide meaningful figures for changes in portfolio value, if there is a parallel shift in the yield curve.
IV). As long as their duration is the same, a bullet and barbell portfolio will always exhibit the same degree of interest rate risk.
A. II, III and IV.
B. I, II, III and IV.
C. I, II and III.
Answer: C
Explanation: (IV) is incorrect because a bullet and barbell portfolio, with the same duration, will only exhibit the same degree of interest rate risk if the yield curve shift is parallel. Otherwise, regardless of whether the durations are the same or not, a non-parallel movement in the yield curve will result in different degrees of price changes for the two portfolios.
