NEW QUESTION: 1 You have a server named Server1 that runs Windows Server 2016.You configure Just Enough Administration (JEA) on Server1.You need to view a list of commands that will be available to a user named User1 when User1 establishes a JEA session to Server1. Which cmdlet should you use?**A.** Trace-Command**B.** Show-Command**C.** Get-PSSessionConfiguration**D.** Get-PSSessionCapability**Answer: D**Explanation:Explanation https://docs.microsoft.com/en-us/powershell/module/Microsoft.PowerShell.Core/get-pssessioncapability?view=powershell-5.0.The Get-PSSessionCapability cmdlet gets the capabilities of a specific user on a constrained sessionconfiguration.Use this cmdlet to audit customized session configurations for users.Starting in Windows PowerShell 5.0, you can use the RoleDefinitions property in a session configuration (.pssc)file.Using this property lets you grant users different capabilities on a single constrained endpoint based on groupmembership.The Get-PSSessionCapability cmdlet reduces complexity when auditing these endpoints by letting youdetermine the exact capabilities granted to a user.This command is used by I.T. Administrator (The"You" mention in the question) to verify configuration for aUser.

NEW QUESTION: 2 The three major causes of change on a project are-**A.** Replacement of the project manager or key project team members, changes in priorities by senior management, and contractual difficulties**B.** Changes in the relative importance of time, resources, or cost; new knowledge about the deliverable; and technological uncertainty**C.** Unavailability of resources promised by the functional managers, cost overruns, and changes in customer requirements**D.** Errors in the initial assessment of how to achieve the goal of the project, new' information about the project deliverable, and a new mandate**Answer: D**

NEW QUESTION: 3 Task: Determine the types of attacks below by selecting an option from the dropdown list.**Answer:** Explanation:ExplanationA: Phishing is the act of sending an email to a user falsely claiming to be an established legitimate enterprise in an attempt to scam the user into surrendering private information that will be used for identity theft.Phishing email will direct the user to visit a website where they are asked to update personal information, such as a password, credit card, social security, or bank account numbers, that the legitimate organization already has. The website, however, is bogus and set up only to steal the

information the user enters on the page.B: Whaling is a specific kind of malicious hacking within the more general category of phishing, which involves hunting for data that can be used by the hacker. In general, phishing efforts are focused on collecting personal data about users. In whaling, the targets are high-ranking bankers, executives or others in powerful positions or job titles. Hackers who engage in whaling often describe these efforts as "reeling in a big fish," applying a familiar metaphor to the process of scouring technologies for loopholes and opportunities for data theft. Those who are engaged in whaling may, for example, hack into specific networks where these powerful individuals work or store sensitive data. They may also set up keylogging or other malware on a work station associated with one of these executives. There are many ways that hackers can pursue whaling, leading C-level or top-level executives in business and government to stay vigilant about the possibility of cyber threats.C: Vishing is the act of using the telephone in an attempt to scam the user into surrendering private information that will be used for identity theft. The scammer usually pretends to be a legitimate business, and fools the victim into thinking he or she will profit.D: SPIM is a term sometimes used to refer to spam over IM (Instant Messaging). It's also called just spam, instant spam, or IM marketing. No matter what the name, it consists of unwanted messages transmitted through some form of instant messaging service, which can include Short Message Service (SMS) E: Social engineering is a non-technical method of intrusion hackers use that relies heavily on human interaction and often involves tricking people into breaking normal security procedures. It is one of the greatest threats that organizations today encounter. A social engineer runs what used to be called a "con game." For example, a person using social engineering to break into a computer network might try to gain the confidence of an authorized user and get them to reveal information that compromises the network's security.Social engineers often rely on the natural helpfulness of people as well as on their weaknesses. They might, for example, call the authorized employee with some kind of urgent problem that requires immediate network access. Appealing to vanity, appealing to authority, appealing to greed, and old-fashioned eavesdropping are other typical social engineering techniques.http://www.webopedia.com/TERM/P/phishing.html
