With our EUNA_2024 exam torrent, you can enjoy the leisure study experience as well as pass the EUNA_2024 exam with success ensured.

NEW QUESTION: 1You need to have an invoice line automatically distributed across multiple cost centers. For example, you want your monthly utility bill allocated across multiple cost centers based on a percentage. Select two methods to achieve this. (Choose two.) **A.** Define a distribution set and assign it manually to the invoice. **B.** Configure Subledger Accounting rules to allocate costs. **C.** Choose the 'All Lines' option from the Allocate menu in the invoice line area. **D.** Define a distribution set and assign it to the supplier. **Answer: A, B**
Explanation:
Explanation A: Account Rules by Segment Define segment rules to derive a specific segment of the general ledger account. For example, a particular segment like the company segment can be determined from the distribution account. Another segment can be determined with the use of a constant value. Creating the account one segment at a time offers greater flexibility, but also requires more setup. **C:** You can use a Distribution Set to automatically enter distributions for an invoice when you are not matching it to a purchase order. For example, you can create for an advertising supplier a Distribution Set that allocates advertising expense on an invoice to four advertising departments.
