Also you can wait the updating or choose to free change to other dump if you have other test, Many people have gained good grades after using our SC-400 real test, so you will also enjoy the good results.

In addition, SC-400 exam dumps contain both questions and answers, and they also cover most of knowledge points for the exam, and you can improve your professional knowledge as well as pass the exam.

You can completely rest assured that our SC-400 dumps collection will ensure you get high mark in the formal test, We are 100% confident that you will be able to pass the Microsoft Information Protection Administrator exam with this guide.

And not only you can enjoy the service before you pay for our SC-400 learning guide, you can also have the right to have free updates for one year after your purchase.

Our SC-400 exam questions boost 3 versions: PDF version, PC version, APP online version, Microsoft Information Protection Administrator exam prep torrent is valuable and validity, which will give you some reference for the actual test.

When you are preparing SC-400 practice exam, it is necessary to grasp the overall knowledge points of real exam by using the latest SC-400 pass guide, Photoexperienceacademy is considered as the top preparation material seller for SC-400 exam dumps, and inevitable to carry you the finest knowledge on SC-400 exam certification syllabus contents.

## 100% Pass Quiz 2024 Useful Microsoft SC-400: Microsoft Information Protection Administrator Exam Labs

Free update for 365 days is available for SC-400 study guide, so that you can have a better understanding of what you are going to buy, You can put all your queries and get a quick and **SC-400 Exam Labs** efficient response as well as advice of our experts on certification tests you want to take.

For the sake of the interests of our customers, we will update our SC-400 practice questions regularly to cater to the demand of them, If you want to get the old version of SC-400 exam bootcamp PDF as practice materials, you purchase our new version we can send you old version free of charge, if this Microsoft SC-400 exam has old version.

Through the free demo questions, they will be clear about the part of the content, the form and assess the validity, Some candidates may find SC-400 Test Simulates unavailable after purchasing.

Our Microsoft Microsoft Information Protection Administrator verified study material is closely **SC-400 Exam Labs** link to the knowledge points, keeps up with the latest test content, You can check out with 1024 Bit SSL encryption.

**NEW QUESTION: 1** Which two of the following are costs businesses may face in dealing with unstructured data? (Choose two.)  
**A.** Buying additional storage capacity  
**B.** Buying backup media  
**C.** Paying to convert unstructured data into structured data  
**D.** Lost productivity due to server downtime  
**Answer: A,B**  
Explanation: Explanation/Reference: Explanation:

**NEW QUESTION: 2** An administrator wants the switches to forward traffic in the legacy mode. If all the controllers fail, which action should the administrator take?  
**A.** Install a packet\_out rule as the lowest priority rule in the flow table.  
**B.** Configure the instance to fail in interruption mode.  
**C.** Install a packetin rule as the lowest priority rule in the flow table.  
**D.** Configure the instance to fail in standalone mode.  
**Answer: D**  
Explanation: OpenFlow instance connection interruption mode You can set the type of behavior when the switch loses connection with the controller. fail-standalone If the switch loses connection with all of the controllers, packets and messages of new flows behave as a legacy switch or router would. Existing flows of this OpenFlow instance are removed.  
Reference: HP OpenFlow Switches

### NEW QUESTION: 3

会社には、次の表に示すユーザーを含むSubscription1という名前のAzureサブスクリプションがあります。会社は新しい所有者に売却されます。

会社はSubscription1の所有権を譲渡する必要があります。

どのユーザーが所有権を譲渡でき、どのツールを使用する必要がありますか？

回答するには、回答エリアで適切なオプションを選択します。

注：それぞれの正しい選択には1ポイントの価値があります。  
**Answer:** Explanation: Explanation  
Box 1; User2  
Billing Administrator  
Select Transfer billing ownership for the subscription that you want to transfer. Enter the email address of a user who's a billing administrator of the account that will be the new owner for the subscription.  
Box 2: Azure Account Center  
Azure Account Center can be used.  
Reference:

<https://docs.microsoft.com/en-us/azure/billing/billing-subscription-transfer#transfer-billing-ownership-of-an-azu>

**NEW QUESTION: 4** Overview  
General Overview  
ADatum Corporation has offices in Miami and Montreal. The network contains a single Active Directory forest named adatum.com. The offices

connect to each other by using a WAN link that has 5-ms latency.

**A:** Datum standardizes its database platform by using SQL Server 2014 Enterprise edition. Databases Each office contains databases named Sales, Inventory, Customers, Products, Personnel, and Dev. Servers and databases are managed by a team of database administrators. Currently, all of the database administrators have the same level of permissions on all of the servers and all of the databases. The Customers database contains two tables named Customers and Classifications. The following graphic shows the relevant portions of the tables: The following table shows the current data in the Classifications table: The Inventory database is updated frequently. The database is often used for reporting. A full backup of the database currently takes three hours to complete. Stored Procedures A stored procedure named USP\_1 generates millions of rows of data for multiple reports. USP\_1 combines data from five different tables from the Sales and Customers databases in a table named Table1. After Table1 is created, the reporting process reads data from Table1 sequentially several times. After the process is complete, Table1 is deleted. A stored procedure named USP\_2 is used to generate a product list. The product list contains the names of products grouped by category. USP\_2 takes several minutes to run due to locks on the tables the procedure accesses. The locks are caused by USP\_1 and USP\_3. A stored procedure named USP\_3 is used to update prices. USP\_3 is composed of several UPDATE statements called in sequence from within a transaction. Currently, if one of the UPDATE statements fails, the stored procedure fails. A stored procedure named USP\_4 calls stored procedures in the Sales, Customers, and Inventory databases. The nested stored procedures read tables from the Sales, Customers, and Inventory databases. USP\_4 uses an EXECUTE AS clause. All nested stored procedures handle errors by using structured exception handling. A stored procedure named USP\_5 calls several stored procedures in the same database. Security checks are performed each time USP\_5 calls a stored procedure. You suspect that the security checks are slowing down the performance of USP\_5. All stored procedures accessed by user applications call nested stored procedures. The nested stored procedures are never called directly.

**Design Requirements**

**Data Recovery** You must be able to recover data from the Inventory database if a storage failure occurs. You have a Recovery Time Objective (RTO) of 5 minutes. You must be able to recover data from the Dev database if data is lost accidentally. You have a Recovery Point Objective (RPO) of one day.

**Classification Changes** You plan to change the way customers are classified. The new classifications will have four levels based on the number of orders. Classifications may be removed or added in the future. Management requests that historical data be maintained for the previous classifications.

**Security** A group of junior database administrators must be able to manage security for the Sales database. The junior database administrators will not have any other administrative rights.

**A:** Datum wants to track which users run each stored procedure.

**Storage** Datum has limited storage. Whenever possible, all storage space should be minimized for all databases and all backups.

**Error Handling** There is currently no error handling code in any stored procedure. You plan to log errors in called stored procedures and nested stored procedures. Nested stored procedures are never called directly. You need to recommend a solution to ensure that USP\_4 adheres to the security requirements. What should you include in the recommendation?

**A.** Enable trace flags.  
**B.** Configure data manipulation language (DML) triggers.  
**C.** Enable SQL Server Audit.  
**D.** Enable C2 audit tracing.

**Answer: C**

**Explanation:** Explanation/Reference: Explanation: Scenario: A stored procedure named USP\_4 calls stored procedures in the Sales, Customers, and Inventory databases. The nested stored procedures read tables from the Sales, Customers, and Inventory databases. USP\_4 uses an EXECUTE AS clause. Beginning in SQL Server 2008 Enterprise, you can set up automatic auditing by using SQL Server Audit.
