The sophisticated contents are useful and contain the [212-81](#) EC-COUNCIL Certified Encryption Specialist latest test material, Do you want to make more money to support your family?

**NEW QUESTION: 1** You plan to deploy a SQL Server Integration Services (SSIS) project by using the project deployment model. You need to monitor control flow tasks to determine whether any of them are running longer than usual. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.) **Answer:** Explanation: Explanation  
Box 1: Connect to the SSISDB database.  
Box 2: Execute the query  
Note: \* execution\_component\_phases Displays the time spent by a data flow component in each execution phase.\* The following example uses the catalog.execution\_component\_phases view to find the total amount of time that a specific package has spent executing in all phases (active\_time), and the total elapsed time for the package (total\_time).  
Use SSISDB  
Select package\_name, task\_name, subcomponent\_name, execution\_path, SUM(DATEDIFF(ms, start\_time, end\_time)) as active\_time, DATEDIFF(ms, min(start\_time), max(end\_time)) as total\_time  
From catalog.execution\_component\_phases  
Where execution\_id = 1841  
Group by package\_name, task\_name, subcomponent\_name, execution\_path  
Order by package\_name, task\_name, subcomponent\_name, execution\_path  
\* catalog.executables This view displays a row for each executable in the specified execution. An executable is a task or container that you add to the control flow of a package. \* (incorrect) catalog.executions (SSISDB Database) Displays the instances of package execution in the Integration Services catalog. Packages that are executed with the Execute Package task run in the same instance of execution as the parent package. This view displays a row for each instance of execution in the catalog. \* (incorrect) catalog.operation\_messages Displays messages that are logged during operations in the Integration Services catalog. This view displays a row for each message that is logged during an operation in the catalog. The message can be generated by the server, by the package execution process, or by the execution engine.  
Reference: catalog.execution\_component\_phases  
Reference: catalog.executables

**NEW QUESTION: 2** Which two security risks can occur with PMTU? (Choose two) **A.** An attacker can cause data loss by sending false messages that indicate that the PMTU is significantly larger than the true PMTU. **B.** An attacker can slow data flow by sending false messages that indicate that the PMTU is significantly larger than the true PMTU. **C.** An attacker can block valid Datagram Too small messages, to cause a DoS. **D.** An attacker can slow data flow by sending false messages that indicate that the PMTU is significantly smaller than the true PMTU. **E.** An attacker can block valid Datagram Too small messages, to cause a DoS. **F.** An attacker can cause data loss by sending false messages that indicate that the PMTU is significantly smaller than the true PMTU. **Answer: C, F**

**NEW QUESTION: 3** During a team status meeting, you, the architect, mention that you are working on sizing the client's new repository using the Documentum Sizing Tool. Your team's System Administrator says, "That is not necessary. I have asked about the size of the repository during installation and we can take care of that there." How do you respond to your System Administrator? **A.** The results of the Documentum Sizing Tool are completely independent of the repository size during installation. **B.** The results of the Documentum Sizing Tool will aid in capacity planning, while the repository size during installation will allocate filestore disk space

for content. **C.** The results of the Documentum Sizing Tool will only determine if the repository size during installation will be small, medium, or large. **D.** The results of the Documentum Sizing Tool will aid in current and future capacity planning. **Answer: D**

**NEW QUESTION: 4A.** debug capwap **B.** show local-auth **C.** debug dot1X **D.** debug group **E.** debug aaa **Answer: E**
