NEW QUESTION: 1You are analyzing the memory usage of a Microsoft SQL Server instance. You need to obtain the information described on the following table. Which performance counter should you use for each requirement? To answer, drag the appropriate performance counters to the correct requirements. Each performance counter may be used once, more than once or not at all. You may need to drag the split bar between panes or scroll to view content. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: Explanation Requirement1: SQL Server: Memory Manager: Total Server Memory (KB) This counter specifies the amount of memory the server has committed using the memory manager. Requirement2: SQL Server: Memory Manager: Granted Workspace Memory (KB) Specifies the total amount of memory currently granted to executing processes, such as hash, sort, bulk copy, and index creation operations. Requirement3: Process: working Set Each time a process is created, it reserves the minimum working set size for the process. The virtual memory manager attempts to keep enough memory for the minimum working set resident when the process is active, but keeps no more than the maximum size. References:

Answer: Explanation: Explanation Step 1: Perform a differential database backup... Step 2: Perform a tail-log backup... A tail-log backup captures any log records that have not yet been backed up (the tail of the log) to prevent work loss and to keep the log chain intact. Before you can recover a SQL Server database to its latest point in time, you must back up the tail of its transaction log. The tail-log backup will be the last backup of interest in the recovery plan for the database. Step 3: The PRIMARY and FG2 for DB1 are damaged. FG1 and FG3 are intact. Step 4: Transaction logs are backed up to a backup set named TLogBackup. Step 5: The PRIMARY and FG2 for DB1 are damaged. References:

NEW QUESTION: 4 HOTSPOTS Scenario A photographer from Portraits Ltd, a professional photographic company, has taken on the role of Team Manager after taking some time to understand the requirements of the project. A contract for their services has been set up and is being monitored by the Purchasing Manager and a Work Package has been agreed. This contract specifies that the photographer must arrange a meeting with the Engineering Manager to establish a schedule for the photo sessions to minimize the impact on the Engineering staff. This meeting should have occurred by now. The Engineering Manager was made aware of this requirement but when asked he reported that he has received no communication from the photographer. The Project Manager has tried to call the photographer and has had no response. The project is now in stage 2. The Project Manager has heard about the possibility of a competitor also producing a calendar to be delivered earlier than the target date for this project. There is a threat that the early release of a competitor's calendar may weaken the impact of the MNO Manufacturing Company calendar, thereby reducing the anticipated benefits of the Calendar project. Column 1 contains a number of risk responses identified by the Project Manager following an assessment of this risk. Column 2 contains a list of threat response types. For each risk response in Column 1, select from Column 2 the type of response it represents. Each option from Column 2 can be used once, more than once or not at all.
