これらの要件を満たすためにSalesforce管理者が実行する必要がある3つのステップはどれですか？  
3つの答えを選択してください。**A.**

プロパティエディターでコンポーネントの[ユーザーランクの表示]チェックボックスを選択します。  
**B.**

レピュテーションリーダーボードコンポーネントをコミュニティ管理のコミュニティページにドラッグします。**C.** コンポーネントのプロパティエディターでユーザー数を5に設定します。**D.**

レピュテーションリーダーボードコンポーネントをSite.comのコミュニティページにドラッグします。  
**E.**

レピュテーションレベルオプションのセットアップと表示を有効にし、コミュニティ管理でレピュテーションを設定します。**Answer: A,C,E**

**NEW QUESTION: 3**회사는 Amazon S3를 사용하여 기밀 감사 문서를 저장합니다. S3 버킷은 버킷 정책을 사용하여 최소 권한 원칙에 따라 감사 팀 IAM 사용자 자격 증명에 대한 액세스를 제한합니다. 회사 관리자는 S3 버킷에서 실수로 문서를 삭제하는 것에 대해 걱정하고 있으며 보다 안전한 솔루션을 원합니다. 솔루션 설계자는 감사 문서를 보호하기 위해 무엇을 해야 합니까?**A.** 각 감사 팀 IAM 사용자 계정에 대해 IAM 사용자 자격 증명에서 다단계 인증 (MFA)을 활성화 합니다.**B.** S3 버킷에서 버전 관리 및 MFA 삭제 기능 활성화**C.** AWS Key Management Service (AWS KMS)를 사용하여 S3 버킷을 암호화 하고 감사 팀 IAM 사용자 계정이 KMS 키에 액세스하지 못하도록 제한합니다.**D.** 감사 날짜 동안 s3 : DeleteObject 작업을 거부하려면 감사 팀의 IAM 사용자 계정에 S3 수명주기 정책을 추가합니다.**Answer: B**

**NEW QUESTION: 4****HOTSPOT****HOTSPOT****Answer:** Explanation:ExplanationFailed Request Tracing is the only option that produces its output in XML files as specified in the question.**Case Study****VanArsdel, Ltd****Overview****VanArsdel, Ltd.** builds skyscrapers, subways, and bridges. VanArsdel is a leader in using technology to do construction better.**Overview****VanArsdel** employees are able to use their own mobile devices for work activities because the company recognizes that this usage enables employee productivity. Employees also access Software as a Service (SaaS) applications, including DocuSign, Dropbox, and Citrix. The company continues to evaluate and adopt more SaaS applications for its business. VanArsdel uses Azure Active Directory (AD) to authenticate its employees, as well as Multi-Factor Authentication (MFA). Management enjoys the ease with which MFA can be enabled and disabled for employees who use cloud-based services. VanArsdel's on-premises directory contains a single forest.**Helpdesk:** VanArsdel creates a helpdesk group to assist its employees. The company sends email messages to all its employees about the helpdesk group and how to contact it. Configuring employee access for SaaS applications is often a time-consuming task. It is not always obvious to the helpdesk group which users should be given access to which SaaS applications. The helpdesk group must respond to many phone calls and email messages to solve this problem, which takes up valuable time. The helpdesk group is unable to meet the needs of VanArsdel's employees. However, many employees do not work with the helpdesk group to solve their access problems. Instead, these employees contact their co-workers or managers to find someone who can help them. Also, new employees are not always told to contact the helpdesk group for access problems. Some employees report that they cannot see all the applications in the Access Panel that they have access to. Some employees report that they must re-enter their passwords when they access cloud applications, even though they have already authenticated.**Bring your own device (BYOD):**VanArsdel wants to continue to support users and their mobile and personal devices, but the company is concerned about how to protect corporate assets that are stored on these devices. The company does not have a strategy to ensure that its data is removed from the devices when employees leave the company.**Customer Support****VanArsdel** wants a mobile app for customer profile registration and feedback. The company would like to keep track of all its previous, current, and future customers worldwide. A profile system using third-party authentication is required as well as feedback and support sections for the mobile app.**Migration:**VanArsdel plans to migrate several virtual machine (VM) workloads into Azure. They also plan to extend their on-premises Active Directory into Azure for mobile app authentication.**Business Requirements****Hybrid Solution:**\* A single account and credentials for both on-premises and cloud applications\* Certain applications that are hosted both in Azure and on-site must be accessible to both VanArsdel employees and partners\* The service level agreement (SLA) for the solution requires an uptime of 99.9%\* The partners all use Hotmail.com email addresses**Mobile App:**VanArsdel requires a mobile app for project managers on construction job sites. The mobile app has the following requirements:\* The app must display partner information.\* The app must alert project managers when changes to the partner information occur.\* The app must display project information including an image gallery to view pictures of construction projects.\* Project managers must be able to access the information remotely and securely.**Security:**\* VanArsdel must control access to its resources to ensure sensitive services and information are accessible only by authorized users and/or managed devices.\* Employees must be able to securely share data, based on corporate

policies, with other VanArsdel employees and with partners who are located on construction job sites.\* VanArsdel management does NOT want to create and manage user accounts for partners. Technical Requirements Architecture:\* VanArsdel requires a non-centralized stateless architecture fonts data and services where application, data, and computing power are at the logical extremes of the network.\* VanArsdel requires separation of CPU storage and SQL services Data Storage: VanArsdel needs a solution to reduce the number of operations on the contractor information table. Currently, data transfer rates are excessive, and queue length for read/write operations affects performance.\* A mobile service that is used to access contractor information must have automatically scalable, structured storage\* Images must be stored in an automatically scalable, unstructured form. Mobile Apps:\* VanArsdel mobile app must authenticate employees to the company's Active Directory.\* Event-triggered alerts must be pushed to mobile apps by using a custom Node.js script.\* The customer support app should use an identity provider that is configured by using the Access Control Service for current profile registration and authentication.\* The customer support team will adopt future identity providers that are configured through Access Control Service. Security:\* Active Directory Federated Server (AD FS) will be used to extend AD into Azure.\* Helpdesk administrators must have access to only the groups of Azure resources they are responsible for. Azure administration will be performed by a separate group.\* IT administrative overhead must be minimized.\* Permissions must be assigned by using Role Based Access Control (RBAC).\* Line of business applications must be accessed securely.
