NEW QUESTION: 1Your company has a private cloud that is managed by using a System Center 2012 infrastructure. The network contains a Service Manager infrastructure. The company implements a service level agreement (SLA) for the private cloud. You need to recommend an escalation notification solution for when an SLA warning threshold is exceeded. What should you include in the recommendation?
A. A subscription
B. A Desired Configuration Management Event Workflow Configuration
C. A rule
D. An incident event workflow
E. A monitor
Answer: D
Explanation: You can use the following procedure to create a workflow rule that will change the support tier to Tier 2 whenever the Urgency property of an incident that is related to printing problems is changed to High. This procedure assumes that you already created an incident template to change the support tier to Tier 2, and it assumes that you already created the priority calculation table. For more information, see [How to Set Incident Priority](#) and "To create a new printer-related incident template" in [How to Create Incident Templates](#).

NEW QUESTION: 2When would you use a Wilcoxon Rank Sum test?
A. When the data cannot easily be sorted
B. When you cannot make an assumption about the distribution of the populations
C. When the data can easily be sorted
D. When the populations represent the sums of other values
Answer: B

NEW QUESTION: 3A customer has engaged a company to improve the availability of all of the customer's services and applications, enabling the customer to minimize downtime to a few hours per quarter. Which of the following will document the scope of the activities the company will provide to the customer, including the intended outcomes?
A. MLAB
B. SOW
C. MOUD
D. SLA
Answer: B
Explanation: SOW stands for Statement of Work. When a company has been hired for a project that involves many tasks, a statement of work is often issued at the start of the project. The SOW will outline the tasks or activities in a project, their costs and the timelines for deliverables within the project. In an IT project, the SOW would define what tasks will be performed (hardware and software upgrades etc.), why the work is being done and how long each stage of the project will take.
