NEW QUESTION: 2Which configuration command ties the router hot standby priority to the availability of its interfaces?**A.** standby priority**B.** standby track**C.** backup interface**D.** standby group**Answer: B****Explanation:****Explanation/Reference:****Explanation:**The standby track interface configuration command ties the router hot standby priority to the availability ofits interfaces and is useful for tracking interfaces that are not configured for HSRP. When a trackedinterface fails, the hot standby priority on the device on which tracking has been configured decreases by 10. If an interface is not tracked, its state changes do not affect the hot standby priority of the configureddevice. For each interface configured for hot standby, you can configure a separate list of interfaces to be tracked.**Reference:**
