World-class service, Our platform will constantly keep you up-to-date with new features and liberates that will make your task easier, Do not contain yourself anymore, come and enjoy this good pie, the COBIT-Design-and-Implementation 100% pass test.

NEW QUESTION: 1 DRAG DROP A company has an existing web application that runs on virtual machines (VMs) in Azure. You need to ensure that the application is protected from SQL injection attempts and uses a layer-7 load balancer. The solution must minimize disruption to the code for the existing web application. What should you recommend? To answer, drag the appropriate values to the correct items. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: Web application firewall (WAF) is a feature of Application Gateway that provides centralized protection of your web applications from common exploits and vulnerabilities. Web application firewall is based on rules from the OWASP core rule sets 3.0 or 2.2.9. Web applications are increasingly targets of malicious attacks that exploit common known vulnerabilities. Common among these exploits are SQL injection attacks, cross site scripting attacks to name a few.

NEW QUESTION: 2 Which guiding principle recommends collecting data before deciding what can be re-used? **A.** Progress interactively with feedback **B.** Start where you are **C.** Focus on value **D.** Keep it simple and practical **Answer: B**

NEW QUESTION: 3 You have a Project Server 2010 environment. You have a single OLAP cube that your executives are using for data analysis. The Department lookup table lists Departments A and B. You need to create a view that shows total project resource costs for Department B, without allowing access to information for Department A. What should you do? **A.** Create an enterprise custom project field that points to the Department lookup table. **B.** Create a new OLAP view that filters for Department **C.** Create a new Portfolio Analysis view that filters for Department B. **D.** Create a new OLAP cube and set department filters. **Answer: D**

NEW QUESTION: 4 There are several devices on a network that are considered critical and need to be placed into the ISE database and a policy used for them. The organization does not want to use profiling. What must be done to accomplish this goal?
A. Enter the IP address in the correct Endpoint Identity Group.
B. Enter the MAC address in the correct Logical Profile.
C. Enter the MAC address in the correct Endpoint Identity Group.
D. Enter the IP address in the correct Logical Profile.
Answer: A
