To be the best global supplier of electronic JN0-223 study materials for our customers' satisfaction has always been our common pursuit, Whenwe do run head-long-slam-bang into the invisible **Top JN0-223 Dumps** barrier that is genuine exhaustion of body and soul, the smart thing to do is stop and revives.

JNCIA-DevOps Certification (JN0-223) JNCIA-DevOps Certification Introduction: The Juniper (JNCIA-DevOps) certification is the first in Juniper´s line of certifications that an Automation and DevOps, Associate (JNCIA-DevOps) aspiring networking professional must acquire in order to add value to their IT career.

NEW QUESTION: 1 You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains a web application named WebApp1. Users access WebApp1 by using the URL http://webapp1. You need to ensure that you can access WebApp1 by using the URL http://webapp2. What should you do? (Each correct answer presents part of the solution. Choose all that apply.)**A.** From Windows PowerShell, run the New-SPAlternateUrl -Url http://webapp2-WebApplication http:// webapp1 -Zone Intranet cmdlet.**B.** To WebApp1, add a managed path named WebApp2.**C.** Create a new web application named http://webapp2.**D.** From Windows PowerShell, run the Set-SPAlternateUrl -Identity http://webapp1 -Url http://webapp2 -Zone Intranet cmdlet.**E.** the site bindings of WebApp1, add the host name WebApp2.**Answer: A,E**Explanation:Explanation/Reference:The New-SPAlternateUrl cmdlet creates a new public or internal URL for the specified Webapplication zone or resource. Use the ResourceName parameter if the alternate URL is for anexternal resource.Each Web application canbe associated with a collection ofmappings between internaland publicURLs. Both internal and public URLs consist of the protocol and domain portion of the full URL; forexample, https://www.fabrikam.com. Users type a public URL to get to the SharePoint site, andthat URL appears in the links on the pages. Internal URLs are in the URL requests that are sent tothe SharePoint site. Many internal URLs can be associated with a single public URL in multiserver farms; for example, when a load balancer routes requests to specific IP addresses to various servers in the load-balancing cluster.Each Web application supports five collections of mappings per URL; the five collections correspond to five zones (default, intranet, extranet, Internet, and custom). When the Web application receives a request for an internal URL in a particular zone, links on the pages returned to the user have the public URL for that zone. ----------EXAMPLE----------#create the public URL New-SPAlternateURL https://www.contoso.com -Zone "Internet" #create the internal URL New-SPAlternateURL http://sharepoint.contoso.com -Zone "Internet" -internal This example translates incoming requests for https://www.contoso.com into http://sharepoint.contoso.com (on the Internet zone).When a reverse proxy is being set up to handle public URL SSL termination, alternate access mappings must be configured to handle the URL translation.

NEW QUESTION: 2 Your network contains several Windows container hosts..You plan to deploy three custom .NET applications.You need to recommend a deployment solution for the applications.Each application must:-be accessible by using a different IP address.-have access to a unique file system.-start as quickly as possible.What should you recommend? To answer, select the appropriate options in the answer area.**Answer:** Explanation:ExplanationBoth Hyper-V container and Windows container could achieve, you'll need 3 containers to do so.

Answer E is correct.-be accessible by using a different IP address.-have access to a unique file system.However, Hyper-V container starts 5 times or more slower than Windows container in our lab, on samecomputer.References:
https://docs.microsoft.com/en-us/dotnet/standard/modernize-with-azure-and-containers/modernize-existing-apps
https://blogs.msdn.microsoft.com/msgulfcommunity/2015/06/20/what-is-windows-server-containers-and-hyper-v

NEW QUESTION: 3 What can be achieved via custom logic in the "Custom Field and Logic" application?Note: There are 3 correct answers to this question.**A.** Extend every app with custom logic.**B.** Create filter conditions to define when an implementation is executed**C.** Create your own implementation using ABAP for key users**D.** Test your custom logic, for example with predefined test variants**Answer: B,C,D**Explanation:Explanation/Reference:To extend an app with custom logic, the app must be extensible. See page 23 of S4C80 Col17.

NEW QUESTION: 4展示を参照してください。ネットワークは図のように計画されています。
どの3つのステートメントが、ネットワーク計画のエリアとデバイスを正確に記述していますか？（3つ選択してください）**A.** ネットワークデバイスBはスイッチです。**B.**
ネットワークデバイスBはハブです。**C.** ネットワークデバイスAはハブです。**D.**
ネットワークデバイスAはスイッチです。**E.** エリア1にはレイヤ2デバイスが含まれています。**F.**
エリア2にはレイヤ2デバイスが含まれています。**Answer: B,D,E**
