**NEW QUESTION: 1** Refer to the exhibit. If EIGRP is configured between two routers as shown in this output, which statement about their EIGRP relationship is true? **A.** The reliability metric is enabled. **B.** The routers are using different authentication key-strings. **C.** The delay metric is disabled. **D.** The routers will establish an EIGRP relationship successfully. **Answer: A**

**NEW QUESTION: 2** What is a common retail industry need? **A.** Connecting citizens with online resources and access to staff. **B.** Improving the customer experience. **C.** Serving rural communities and underserved populations. **D.** Improving the quality of healthcare. **Answer: A**

**NEW QUESTION: 3** Suppose you have a column in which most records are going to be between 30 and 32 characters. Which of the following column types would be most efficient? **A.** CHAR **B.** VARCHAR **C.** Either VARCHAR or CHAR **D.** TEXT **Answer: A** Explanation: 27.2. Choosing Data Types for Character Columns If stored string values all have the same length, use a fixed-length type rather than a variable-length type. To store values that are always 32 characters long, CHAR(32) requires 32 characters each, whereas VARCHAR(32) requires 32 characters each, plus an extra byte to store the length. In this case, VARCHAR requires one byte more per value than CHAR.

**NEW QUESTION: 4** The role of the incident report in risk management is: **A.** liability protection. **B.** to provide data for analysis by a risk manager to determine how future problems can be avoided. **C.** to discipline staff for errors. **D.** all of the above. **Answer: B** Explanation: Explanation/Reference: Explanation: Incident reports are a tool for determining how future problems can be avoided. Incident reports do not provide liability protection. Incident reports are not meant to be used for disciplining staff. Safety and Infection Control
