NEW QUESTION: 2Which term is used to describe a class that inherits functionality from an existing class?**A.** Derived class**B.** Base class**C.** Inherited class**D.** Superclass**Answer: A**Explanation:Classes (but not structs) support the concept of inheritance. A class that derives from another class (the base class) automatically contains all the public, protected, and internal members of the base class except its constructors and destructors.

NEW QUESTION: 3The Decision Tree Each node in the tree displays>Note: There are 4 correct answers to this question.**A.** The Population of the node**B.** The categories on which the node population has been filtered, for example{Married-AFspouse;Never- married}**C.** The name of the expanded variable, for example Marital-status.**D.** The Usage entries are sparser and report a more global view of the activity on the server. They consist of one line per event on the

following events: user connection, user disconnection, training a model, applying a model, saving a model.**E.** The ratio of Positive Target (for nominal targets) or the Target Mean (for continuous targets)**Answer: A,B,C,E**

NEW QUESTION: 4Your company plans to use Office 365 and Microsoft SharePoint Online. Another employee provisions the company's Office 365 tenant. You discover that the employee can create and manage SharePoint site collections. You need to prevent the employee from creating or managing site collections. From which role should you remove the employee?**A.** Service administrator**B.** Global administrator**C.** SharePoint Online administrator**D.** Site collection administrator**Answer: B****Explanation:**ExplanationThe question states that "Another employee provisions the company's Office 365 tenant". The person who provisions an Office 365 tenant will automatically be assigned to the Global administrator role. In Office 365, a Global administrator is also a SharePoint Online administrator. We could prevent the employee from creating or managing site collections by removing the employee from the SharePoint Online administrator role. However, as a Global Administrator, the employee could add himself/herself back to the SharePoint Online administrator role. Therefore, we should remove the employee from the Global Administrator role.**References:**
