**NEW QUESTION: 4** **A.** Option C **B.** Option A **C.** Option D **D.** Option B **Answer: B** Explanation: Explanation A. Offline Files to provide faster access to cached files and redirected folders. B. Defines a slow connection for purposes of Applying and updating Group Policy. C. automatically tracks roaming and bandwidth usage limits while on metered connections D. Lists network files and folders that are always available for offline use. This policy makes the specified files and folders available offline to users of the computer. When Offline Files is operating in the slow-link mode, all network file requests are satisfied from the OfflineFiles cache. This is similar to a user working offline. If you enable this policy setting, Offline Files uses the slow-link mode if the network throughput between the client and the server is below (slower than) the Throughput threshold parameter, or if the round-trip network latency is above (slower than) the Latency threshold parameter.
