**NEW QUESTION: 1** Which choice below MOST accurately describes a Covert Storage Channel? **A.** A process that manipulates observable system resources in a way that affects response time **B.** A communication channel that allows a process to transfer information in a manner that violates the systems security policy **C.** An information transfer path within a system **D.** An information transfer that involves the direct or indirect writing of a storage location by one process and the direct or indirect reading of the storage location by another process **Answer: D**  
Explanation: A covert storage channel typically involves a finite resource (e.g., sectors on a disk) that is shared by two subjects at different security levels. One way to think of the difference between covert timing channels and covert storage channels is that covert timing channels are essentially memoryless, whereas covert storage channels are not. With a timing channel, the information transmitted from the sender must be sensed by the receiver immediately, or it will be lost. However, an error code indicating a full disk which is exploited to create a storage channel may stay constant for an indefinite amount of time, so a receiving process is not as constrained by time. \*Answer "A process that manipulates observable system resources in a way that affects response time" is a partial description of a covert timing channel. A covert timing channel is a covert channel in which one process signals information to another by modulating its own use of system resources (e.g., CPU time) in such a way that this manipulation affects the real response time observed by the second process. \*Answer "An information transfer path within a system" is a generic definition of a channel. A channel may also refer to the mechanism by which the path is effected. \*Answer "A communication channel that allows a process to transfer information in a manner that violates the systems security policy" is a higher-level definition of a covert channel. While a covert storage channel fits this definition generically.
