Sie planen, mehrere virtuelle Azure-Maschinen bereitzustellen. Sie müssen sicherstellen, dass die auf den virtuellen Maschinen ausgeführten Dienste verfügbar sind, wenn ein einzelnes Rechenzentrum ausfällt. Lösung: Sie stellen die virtuellen Maschinen für zwei oder mehr Ressourcengruppen bereit. Erfüllt dies das Ziel? **A. Nein B. Ja** **Answer: A** Explanation: Explanation A resource group is a logical container for Azure resources. When you create a resource group, you specify which location to create the resource group in. However, when you create a virtual machine and place it in the resource group, the virtual machine can still be in a different location (different datacenter). Therefore, creating multiple resource groups, even if they are in separate datacenters does not ensure that the services running on the virtual machines are available if a single data center fails.
