You are unable to find a better way than TIBCO BusinessWorks Certified Associates Exam valid training torrent.

NEW QUESTION: 1You are developing a Java program to play Tic-Tac-Toe. You define the following array to store the state of the board:Use the drop-down menus to select the answer choice that answers each question based on the information presented in the code.**Answer:**
Explanation:

NEW QUESTION: 2What happens when the EMC/TimeFinder Mirror Restore operation is performed?**A.** BCV is made independently accessible**B.** All data from Standard Volume is copied to the BCV**C.** Data is copied incrementally from the Standard Volume to the BCV**D.** All data from the BCV is copied to the Standard Volume**Answer: D**

NEW QUESTION: 3Hotspot Question - RIPv2 Troubleshooting IIR1 router clock is synchronized with ISP router R2 is supposed to receive NTP updates from R1.But you observe that R2 clock is not synchronized with R1.What is the reason R2 is not receiving NTP updates from R1?**A.** R2 router Ethernet interface that is connected to R1 is placed in shutdown condition.**B.** The IP address that is used in the NTP configuration on R2 router is incorrect.**C.** R1 router Ethernet interface that is connected to R2 is placed in shutdown condition.**D.** The NTP server command not configured on R2 router.**Answer: B**Explanation:First we should verify if the ports connected between R1 and R2 is in "up/up" state with the "show ip interface brief" command on R1 & R2. Note: We learn R1 & R2 connect to each other via E0/2 interface because the IP addresses of these interfaces belong to 192.168.10.0/30 subnet. Both of them are "up/up" so the link connecting between R1 & R2 is good.Next we need to verify the ntp configuration on R2 with the "show running-config" command:So there is only one command related to NTP configuration on R2 so we need to check if the IP address of 192.168.100.1 is correct or not. But from the "show ip interface brief" command on R1 we don't see this IP -> This IP address is not correct. It should be 192.168.10.1 (IP address of interface E0/2 of R1), not 192.168.100.1.
