NEW QUESTION: 1Select all that apply for IAM best practice:Choose the 2 correct answers:**A.** Grant most privilege**B.** Mange permissions with groups**C.** Grant least privilege**D.** Manage permission individually**Answer: B,C****Explanation:**When you create IAM policies, follow the standard security advice of granting least privilege--that is, granting only the permissions required to perform a task. Determine what users need to do and then craft policies for them that let the users perform only those tasks. Instead of defining permissions for individual IAM users, it's usually more convenient to create groups that relate to job functions (administrators, developers, accounting, etc.). Next, define the relevant permissions for each group. Finally, assign IAM users to those groups. All the users in an IAM group inherit the permissions assigned to the group. That way, you can make changes for everyone in a group in just one place. As people move around in your company, you can simply change what IAM group their IAM user belongs to.**Reference:**
