NEW QUESTION: 4 You are providing AWS consulting services for a company developing a new mobile application that will be leveraging Amazon SNS Mobile Push for push notifications. In order to send direct notification messages to individual devices each device registration identifier or token needs to be registered with SNS; however the developers are not sure of the best way to do this. You advise them to:
A. Implement a token vending service to handle the registration.
B. Let the push notification service (e.g. Amazon Device Messaging) handle the registration.
C. Bulk upload the device tokens contained in a CSV file via the AWS Management Console.
D. Call the CreatePlatformEndPoint API function to register multiple device tokens.
Answer: B
