NEW QUESTION: 4Which of the following statements describes the relationship between Cloud computing and Grid computing?
A. Grid architectures are likely to be used in building Clouds
B. Grid computing is the same as Cloud computing
C. Grid computing is an evolution of the Cloud computing architecture
D. Grid computing and Cloud computing are totally unrelated concepts
Answer: A
Explanation: The term utility computing is often used to describe the metered (or pay-per-use) IT services enabled by grid computing. Cloud computing (where dynamically scalable and often virtualized resources are provided as a service over the internet) is another
