You can recover your password (if you forget **New C-ARCON-2404 Test Dumps** it) by following the instructions on the website, We build revolutionary friendship with customers because we try our best **New C-ARCON-2404 Test Dumps** to serve for our customers and consider the benefits of users at every aspect.

Our experts composed the contents according to C-ARCON-2404 Reliable Practice Questions the syllabus and the trend being relentless and continuously updating in recent years.

NEW QUESTION: 1When is a foreign key check performed on an input/output field?**A.** If the field refers to a dictionary filed for which a check table is defined**B.** If the fields refers to a dictionary field for which a value help is defined**C.** If the field refers to a dictionary filed for which a search help is defined**D.** If the fields refers to a dictionary field for which an append search is defined**Answer: A**

NEW QUESTION: 2

あなたのデータベースには、中間層アプリケーション・サーバー上で実行されるアプリケーション用に構成されたSRV1サービスを提供しています。アプリケーションは複数のモジュールを持っています。次のコマンドを実行して、サービスレベルでトレースを有効にします:SQL > exec

```
DBMS_MONITOR.SERV_MOD_ACT_TRACE_ENABLE ('SRV1');
```

トレースファイルを集約する可能な結果とアクションは次のようになります:

- 1.モジュール名が指定されていないため、コマンドは失敗します。
- 2.トレースファイルはSRV1サービスを実行している各セッションのために作成されます。
- 3.集約されたトレース・ファイルはSRV1サービスを実行しているすべてのセッションのために作成されます。
- 4.トレース・ファイルはtrcscsユーティリティを使用して集約することができます。
- 5.トレース・ファイルはtkprofユーティリティを使用して集約します。

正しい結果とTKPROFユーティリティを使用して集約するステップを識別してください。**A. 2と4B. 3と5C. 3と4D. 2と5E. 0****Answer: A**

Explanation: Tracing information is present in multiple trace files and you must use the trcscs tool to collect it into a single file.
Incorrect: Not 1: Parameter service_name Name of the service for which tracing is enabled.
module_name Name of the MODULE. An optional additional qualifier for the service.
Note: * The procedure enables a trace for a given combination of Service, MODULE and ACTION name. The specification is strictly

hierarchical: Service Name or Service Name/MODULE, or Service Name, MODULE, and ACTION name must be specified. Omitting a qualifier behaves like a wild-card, so that not specifying an ACTION means all ACTIONS. Using the ALL_ACTIONS constant achieves the same purpose.*
SERV_MOD_ACT_TRACE_ENABLE Procedure This procedure will enable SQL tracing for a given combination of Service Name, MODULE and ACTION globally unless an instance_name is specified.*
DBMS_MONITOR.SERV_MOD_ACT_TRACE_ENABLE(service_name IN VARCHAR2, module_name IN VARCHAR2 DEFAULT ANY_MODULE, action_name IN VARCHAR2 DEFAULT ANY_ACTION, waits IN BOOLEAN DEFAULT TRUE, binds IN BOOLEAN DEFAULT FALSE, instance_name IN VARCHAR2 DEFAULT NULL);

NEW QUESTION: 3 You have a server that runs Windows Server 2008 R2. The server has Microsoft SharePoint Foundation 2010 installed. The server is configured to accept incoming email. You create a new document library. You need to ensure that any user can send e-mail to the document library. What should you do?
A. Enable anonymous authentication for the Web application.
B. Modify the incoming email settings for the document library.
C. Modify the RSS setting for the document library.
D. Modify the permissions for the document library.
Answer: B
Explanation: Enable and configure email settings for a library Use this procedure to enable and configure email settings for a library to receive email messages in the SharePoint document library in a site. Enable and configure email settings for a library
1. Open the site in which you want to receive email messages by using either of the following methods:
- In Internet Explorer, type the URL of the site.
- On the View Site Collection page, click the site collection that you want to view.
2. In the left navigation pane of the home page, click View All Site Content.
3. In the Documents section, click a document library name to open the library for which you want to enable and configure email settings.
4. On the Settings menu, click Document Library Settings, Picture Library Settings, or Form Library Settings, depending on the kind of library that you are enabling and configuring.
5. In the Communications section, click Incoming email settings.
6. In the Email section, select Yes to enable this library to receive email messages.
7. In the Email address box, type a unique name to use as part of the email address for this library.
8. In the Email Attachments section, decide where to save and how to group the email attachments in this library, and then choose whether to overwrite files that have the same name. Note: If you decide not to overwrite files that have the same name and then later try to save a file that has the same name as one that already exists in the library, four random digits are appended to the file name for the new attachment. If this action fails, a globally unique identifier (GUID) is appended to the file name. If neither of these actions can produce a unique file name, the attachment is discarded.
9. In the Email Message section, choose whether to save the original email message in this library. If you select Yes, the original message is saved as a separate item in the library.
10. In the Email Meeting Invitations section, choose whether to save the attachments to your meeting invitations in this library.
11. In the Email Security section, choose whether to archive email messages only from members of the site who can write to the library or to archive regardless of who sends the email message.
12. Click OK to save the changes that you have made in the settings.

NEW QUESTION: 4 A customer hires you to create an incremental backup scheme. Which solution would you recommend to the customer?
A. Create a backup scheme that will do a full backup and then only backup files selected by the host owner.
B. Create a backup scheme that will do a full backup and then only backup changed data since the last backup.
C. Create a backup scheme that will do a full backup and then only backup selected files.
D. Create a backup scheme that will do a full backup and then only backup changes since the full backup.
Answer: B
