Questions & Answers are compiled by a group **Exam SAFe-SGP Book** of Senior IT Professionals, Online and offline chat service are available, if you have any questions about SAFe-SGP exam materials, you can have a conversation with us, and we will give you reply soon as possible.

**NEW QUESTION: 1**You are selling an HP customer a new solution and want to recommend HP Proactive Care. The customer has purchased HP Foundation Care in the past for other HP solutions. Which benefit does Proactive Care offer this customer that Foundation Care does not?**A.** health scan**B.** firmware updates**C.** hardware support**D.** 24x7 coverage window**Answer: D****Explanation:**Reference:  
<http://www.data3.com/wp-content/uploads/2014/07/Proactive-Care-versus-Foundationcare.pdf>

**NEW QUESTION: 2**Which feature should you activate for the sales department?**A.** SharePoint Server Standard Site Collection features**B.** SharePoint Server Publishing Infrastructure**C.** Site Policy feature**D.** SharePoint Server Enterprise Site Collection features**Answer: B****Explanation:** Topic 1, Contoso Ltd Overview This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the button to return to the question. Existing Environment Productivity Environment Contoso recently installed a highly available SharePoint Server farm that has Office Server deployed. Microsoft OneDrive for

Business in SharePoint Server is deployed to 10,000 users. All user accounts are currently stored in an Active Directory Domain Services (AD DS) environment. Each user account has a profile picture in Active Directory. You recently purchased a SharePoint Online subscription. A small number of users currently use SharePoint Online by using cloud identities. The root site collection of the farm has a URL of <https://portal.contoso.com>. Tens of thousands of documents are added to the farm daily. The farm contains the servers shown in the following table. Current Business Model Contoso has the following business model: \* Users in the research department apply hundreds of terms and keywords as metadata in document libraries. \* The marketing department maintains an external database to store customer information. The information is available in some SharePoint lists and libraries as metadata by using external content types. Problem Statements Contoso identifies the following issues: \* Users report that it takes a long time for new documents to appear in search results and the SharePoint sites are slow to load. \* Users in SharePoint Online cannot tag documents by using the terms and keywords available in SharePoint Server on-premises. \* Users report that data refresh in Microsoft Excel Online and the Excel Web Access web part fail to work. Requirements Business Goals Contoso wants to provide seamless, streamlined access to business information, while maintaining appropriate security for employees and contractors. Technical Requirements Contoso identifies the following technical requirements: \* Add a picture to the user profile page of each user. \* Resolve the Excel Online issues and enable Excel data refresh. \* Deploy hybrid OneDrive for Business to the remaining 50,000 users. \* Prevent solutions from affecting the performance of existing services. \* Improve search indexing and response times of the existing SharePoint sites. \* Ensure that solutions use the principle of least privilege whenever possible. \* Migrate the terms and keywords from SharePoint Server on-premises to SharePoint Online. \* Configure Microsoft Office 365 for SharePoint hybrid and provide a single sign-on (SSO) experience. Configure the permissions for the external content types of the marketing department to meet the following requirements: 1. Users in the HR department must be able to see customer data. 2. Users in the research department must be able to read and write data. 3. Contractors must be able to see data directly from Office applications. Ensure that on-premises data from SQL Server databases, SharePoint lists, and Oracle databases can be used to generate reports and dashboards in Microsoft Power BI.

**NEW QUESTION: 3** Refer to the exhibit. Which statement about the output is true? **A.** The overload bit set by R4 for IPv6 only **B.** The overload bit is not set for any topology under router IS-IS on R4 **C.** The overload bit is not set for any topology under router IS-IS on R5 **D.** The overload bit is set by R4 for IPv4 and IPv6 **E.** The overload bit is set by R5 for IPv4 and IPv6 **F.** The overload bit is set by R5 for IPv6 only **Answer: A**

**NEW QUESTION: 4** **A.** Option **A** **B.** Option **D** **C.** Option **B** **D.** Option **C** **Answer: C** **Explanation:** Provider Hosted Application Provider hosted apps are also a part of cloud hosting model, where app can be hosted on any remote web platform such as IIS server. And these apps are made available on deploying it on cloud i.e. using SharePoint online, Office 365 site, or Windows Azure in case of Auto hosting. It interacts with SharePoint 2013 by using one of the SharePoint client object models or its REST/OData-based web service. Depending on the scenario it gains authorization to SharePoint data using either the SharePoint 2013 implementation of the OAuth standard or a JavaScript cross-domain library. Note: Apps in SharePoint 2013 app model has three types of hosting model. a. SharePoint Hosted Application. b. Auto Hosted Application. c. Provider Hosted Application. **Incorrect:** Not C: When you use the full-trust execution model, you deploy your assemblies to the global assembly cache on each Web front-end server and application server in the server farm. The SharePoint Web application process loads the assembly from the global assembly cache and your code runs with full trust—in other words, it runs without any code access security restrictions. Reference: Step by step create provider hosted application using SharePoint 2013
