C. normalization
D. defragmentation
Answer: C

NEW QUESTION: 3 What is the MAIN purpose of a change management policy?
A. To assure management that changes to the Information Technology (IT) infrastructure are necessary
B. To determine the necessary for implementing modifications to the Information Technology (IT) infrastructure
C. To verify that changes to the Information Technology (IT) infrastructure are approved
D. To identify the changes that may be made to the Information Technology (IT) infrastructure
Answer: B

NEW QUESTION: 4 A. FB00::/8 B. 2002::/16 C. FD00::/8 D. 2001::/32
Answer: C
Explanation:
Explanation The address block fc00::/7 is divided into two /8 groups:
+ The block fc00::/8 has not been defined yet. It has been proposed to be managed by an allocation authority, but this has not gained acceptance in the IETF
+ The block fd00::/8 is defined for /48 prefixes, formed by setting the 40 least-significant bits of the prefix to a randomly generated bit string
Prefixes in the fd00::/8 range have similar properties as those of the IPv4 private address ranges:
+ They are not allocated by an address registry and may be used in networks by anyone without outside involvement.
+ They are not guaranteed to be globally unique.
+ Reverse Domain Name System (DNS) entries (under ip6.arpa) for fd00::/8 ULAs cannot be delegated in the global DNS.
