NEW QUESTION: 3How does a device on a network using ISE receive its digital certificate during the new-device registration process?**A.** ISE acts as a SCEP proxy to enable the device to receive a certificate from a central CA server.**B.** The device requests a new certificate directly from a central CA.**C.** ISE issues a certificate from its internal CA server.**D.** ISE issues a pre-defined certificate from a local database.**Answer: A**
Explanation: SCEP Profile Configuration on ISE
Within this design, ISE is acting as a Simple Certificate Enrollment Protocol (SCEP) proxy server, thereby allowing mobile clients to obtain their digital certificates from the CA server. This important feature of ISE allows all endpoints, such as iOS, Android, Windows, and MAC, to obtain digital certificates through the ISE. This feature combined with the initial registration process greatly simplifies the provisioning of digital certificates on endpoints.
