Our CLF-C02 study materials will help you to pass the exam easily, Each section of the CLF-C02 Prep course includes a comprehensive quiz to test your knowledge.

**NEW QUESTION: 1**Your company has created a set of keys using the AWS KMS service. They need to ensure that each key is only used for certain services. For example, they want one key to be used only for the S3 service. How can this be achieved? Please select:  
**A.** Use the kms:ViaService condition in the Key policy  
**B.** Create an IAM policy that allows the key to be accessed by only the S3 service.  
**C.** Create a bucket policy that allows the key to be accessed by only the S3 service.  
**D.** Define an IAM user, allocate the key and then assign the permissions to the required service  
Option A and B are invalid because mapping keys to services cannot be done via either the IAM or bucket policy  
Option D is invalid because keys for IAM users cannot be assigned to services  
This is mentioned in the AWS Documentation  
The kms:ViaService condition key limits use of a customer-managed CMK to requests from particular AWS services. (AWS managed CMKs in your account, such as aws/s3, are always restricted to the AWS service that created them.) For example, you can use kms:ViaService to allow a user to use a customer managed CMK only for requests that Amazon S3 makes on their behalf. Or you can use it to deny the user permission to a CMK when a request on their behalf comes from AWS Lambda.  
**Answer: A**  
Explanation: For more information on key policy's for KMS please visit the following URL: <https://docs.aws.amazon.com/kms/latest/developerguide/policy-conditions.html>  
The correct answer is: Use the kms:ViaService condition in the Key policy  
Submit your Feedback/Queries to our Experts

### **NEW QUESTION: 2** ホットスポットの質問

企業の本社が、新しいオフィスの場所で使用するクラスBサブネットの一部をオフィスに提供しました。各部門に対応するために必要な最小数のアドレスを（CIDR表記を使用して）割り当てます。各部門に対応するように変更し、グラフィックの質問に回答して、サブネットの未使用部分を特定します。すべてのドロップダウンに入力する必要があります。

手順：シミュレーションが完了したら、[完了]ボタンを選択して送信してください。

すべてのネットワークの範囲は / 0 から / 32 の形式です  
**Answer:** Explanation: Explanation: Sales network - /26 - This will provide up to 62 usable IP addresses (64-2 for subnet and broadcast IP)  
HR network - /27 - This will provide for up to 30 usable IP's (32-2)  
IT - /28 - This will provide for up to 14 usable IP's (16-2)  
Finance - /26 - Note that a /27 is 32 IP addresses but 2 of those are reserved for the network and broadcast IP's and can't be used for hosts.  
Marketing - /28  
If we add up how many IP blocks are used that is 64+32+16+64+16=192.  
A /24 contains 256 IP addresses, so 256-192=64.  
So the last unused box should be a /26, which equates to 64 addresses

**NEW QUESTION: 3** During system setup, how are scheduled reports handled?  
**A.** Scheduled reports are only configured after system setup.  
**B.** By default scheduled reports are sent to the

alert recipient specified in the system setup. **C.** The recipient for scheduled reports can be different than the alert recipient and scheduled reports can be configured during system setup or afterwards. **Answer: A**
