NEW QUESTION: 3 A customer has 30 client computers. All of the client computers have an OEM version of Windows 7 installed. On one of the client computers, the customer upgrades the motherboard to a new motherboard that has a faster chipset. You need to recommend a solution to ensure that the client computer is legally licensed. The solution must minimize licensing costs. What should you recommend? **A.** Purchase a Full Packaged Product (FPP) version of Windows 7. **B.** Obtain a new OEM license of Windows 7 from the hardware vendor. **C.** Request a new product key from the Microsoft Activation Center. **D.** Purchase an Upgrade license of Windows 7 from a retail store. **Answer: A**

NEW QUESTION: 4 You are working for a company that designs mobile applications. They maintain a server where player records are assigned to their different games. The tracking system is new and in development. The application uses Entity Framework to connect to an Azure Database. The database holds a Player table and Game table. When adding a player, the code should insert a new player record, and add a relationship between an existing game record and the new player record. The application will call CreatePlayerWithGame with the correct gameId and the playerId to start the process. (Line numbers are included for reference only.) For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation Many-to-many relationships without an entity class to represent the join table are not yet

supported. However, you can represent a many-to-many relationship by including an entity class for the join table and mapping two separate one-to-many relationships.
