NEW QUESTION: 3The MOST useful way to describe the objectives in the information security strategy is through:**A.** attributes and characteristics of the 'desired state."**B.** calculation of annual loss expectations.**C.** overall control objectives of the security program.**D.** mapping the IT systems to key business processes.**Answer:** AExplanation:ExplanationSecurity strategy will typically cover a wide variety of issues, processes, technologies and outcomes that can best be described by a set of characteristics and attributes that are desired. Control objectives are developed after strategy and policy development. Mapping IT systems to key business processes does not address strategy issues. Calculation of annual loss expectations would not describe the objectives in the information security strategy.
